

简介 General Description

本产品是由我公司YBZ系列液压动力单元产品中的一部分，它广泛应用于汽车举升机，手动阀控制回油，下降速度可调，同时还可以用作液压叉车及剪叉式升降机的动力源。

As one part of our YBZ series power unit family, this power unit is widely used in two-post auto hoists. Push the start button on the motor to lift the machine. The lowering movement is activated by the manual release valve, with the lowering speed controlled by the throttle valve in the return line. The power unit also applies to different kinds of hydraulic fork lift and scissors lift.
